EFdeN, Sustainable, Energy Efficient Buildings, Romania <http://www.efden.org/>

EFdeN, where N is Nature, is our answer to Bucharest's and other cities from Romania and all around the world most pressing problems. Our goal is improve Bucharest's density of habitation by supporting a polycentric development of the metropolis, growth of mobility within the town and the creation of sustainable communities, all of these in a framework of reuniting the individual with nature.

Melissa Climate, Smart cooling solutions, Bulgaria <http://seemelissa.com/>

Melissa saves on your electricity bill by learning and adapting to your individual lifestyle. Melissa Climate Ltd is a next-gen innovation manufacturer. We offer you a product which can add energy efficient smart-home value to your portfolio.

33 sustainable islands, DAFNI, Greece <http://www.dafni.net.gr/en/home.htm>

DAFNI is a voluntary scheme of island communities aiming to promote a sustainable future, through concerted action. Every member of the network is committed to achieving a number of concrete targets, which are subject to external certification.

Strawberry Energy, Serbia <http://senergy.rs/>

We develop green and smart urban devices to provide energy, connectivity and local information in public spaces. We are pioneering the market of public charging stations for portable devices.

Pipistrel, Slovenia <http://www.pipistrel.si/>

The world's first electrically powered training airplanes' manufacturer is not an aerospace giant. Pipistrel is a small Slovenian plane-maker with big ambitions for pioneering environmentally friendly flight.
